Grow your business with RIG

We are excited to enter the 2025 market as one of only two global interior protection companies to have achieved FM Approval for a fire release system. It is already being accepted by FM Global insurers.

As a mid-size company in the containment industry, our top priority is delivering competitive price points and ensuring the safe application of our containment systems for our numerous national manufacturers and the roofing/ construction industry.

We look forward to further discussions as project demands arise for this revolutionary engineered system (RID, LLC), specifically designed for below-sprinkler suppression systems.

RIG Management

RIG-135 & RIG-165 FM Certified Products

got you covered!
